Index

| Applied Econometrics. An Introduction | 1 |
|--|----|
| 1. Introduction | 5 |
| 1.1 What is econometrics? | 5 |
| 1.2 Elements of an econometric study | 5 |
| 1.3 Data | 9 |
| 1.4 The descriptive analysis | 10 |
| 1.5 Some examples | 11 |
| The main concepts of this chapter | 20 |
| 2. The Linear Regression Model | 23 |
| 2.1 Definitions and notation | 23 |
| 2.2 The assumptions of the linear regression model | 27 |
| 2.3 The role of the error term | 29 |
| 2.4 OLS estimators of the regression function parameters | 30 |
| 2.5 The linear model and the OLS estimators in vector notation | 33 |
| 2.6 Properties of OLS estimators | 36 |
| 2.6.1. Unbiasedness | 36 |
| 2.6.2 The variance of the OLS estimators | 37 |
| 2.6.3 Consistency | 39 |
| 2.6.4 Efficiency of OLS estimators | 39 |
| 2.6.5 The distribution of the OLS estimators | 41 |
| 2.6.6. Orthogonality between OLS fitted values and residuals | 42 |
| 2.7 An estimator of the error variance | 43 |
| 2.8 Maximum Likelihood Estimators for the linear model | 47 |
| 2.9 The coefficient of determination | 50 |
| 2.10 Linear transformations of variables and their effects | 52 |
| 2.11 The multiple regression model | 54 |

| 2.12 Multicollinearity | 59 |
|---|------|
| 2.13 An empirical analysis with simulated data | 60 |
| 2.14 An empirical analysis of aggregate consumption | 70 |
| 2.15 An empirical analysis of aggregate investment | 74 |
| 2.16 An empirical analysis of labor productivity | 76 |
| The main concepts of this chapter | 77 |
| Exercises | 80 |
| 3. Inference in the Linear Regression Model | 83 |
| 3.1 Interval estimators | 83 |
| 3.2 Testing hypothesis on the parameters of the linear regression | |
| model | 87 |
| 3.3 Type I and type II errors | 94 |
| 3.4 The concept of p-value | 96 |
| 3.5 Significance testing | 98 |
| 3.6 The relationship between confidence intervals and hypothesis | 00 |
| 2.7 One must take | 100 |
| 2.9 The E test | 100 |
| 2.0 Province 1 OLS regimentants | 101 |
| 2.10 Onities I marinellance and involvement on viel land | 100 |
| 2.11 Are approximately and irrelevant variables | 110 |
| 3.11 An empirical analysis with artificial data | 112 |
| 5.12 An empirical analysis of the determinants of aggregate | 110 |
| 2 12 Ar annuicial an Incia Cala Interminante a Canana de | 119 |
| 5.15 An empirical analysis of the determinants of aggregate | 100 |
| investment | 122 |
| 2.15 An empirical analysis of the CADM | 120 |
| 5.15 An empirical analysis of the CAPM | 12/ |
| The main concepts of this chapter | 120 |
| Exercises | 134 |
| 4. The Generalized Linear Regression Model | 137 |
| 4.1 Heteroscedasticity and serial correlation of the errors | 137 |
| 4.2 The Generalized Least Squares estimators (GLS and EGLS) | 140 |
| 4.3 Tests for homoscedasticity | 140 |
| 4.4 Tests for no correlation | 144 |
| 4.5 The assumptions of Normality of the errors | 1/17 |
| 4.6 The hypothesis of linearity in the parameters | 140 |
| 4.7 Nonlinear transformations of the variables | 150 |
| T, / INOLIMICAL MAISTOLIHAUOUS OF THE VALIABLES | 100 |

| 4.8 An empirical analysis with simulated data | 154 |
|---|-----|
| 4.9 An empirical analysis of the determinants of aggregate | |
| consumption | 167 |
| The main concepts of this chapter | 169 |
| Exercises | 171 |
| 5. Parameter Instability in the Linear Regression Model | 173 |
| 5.1 Structural breaks and tests for parameter stability | 173 |
| 5.2 Recursive estimation methods | 177 |
| 5.3 Remedies for parameter instability | 179 |
| 5.4 Forecasting with the linear regression model | 183 |
| 5.5 Forecasting with unknown parameters | 186 |
| 5.6 Multi-step ahead forecasting | 189 |
| 5.7 An empirical analysis with simulated data | 191 |
| 5.8 An empirical analysis of the determinants of aggregate | |
| consumption | 203 |
| The main concepts of this Chapter | 211 |
| Exercises | 215 |
| 6. Stochastic Regressors | 219 |
| 6.1 Stochastic regressors, independent of the error term | 219 |
| 6.2 Stochastic regressors, asymptotically uncorrelated with the error | |
| term | 221 |
| 6.3 Stochastic regressors, correlated with the error term | 223 |
| 6.4 Instrumental Variables (IV) and IV estimator | 225 |
| 6.5 Two-Stage Least Squares (TSLS) estimator and the | |
| over-identification test | 228 |
| 6.6 The Hausman Test | 232 |
| 6.7 An empirical analysis based on simulated data | 235 |
| 6.8 An empirical analysis of aggregate consumption | 239 |
| The main concepts of this chapter | 243 |
| Exercises | 246 |
| 7. Dynamic Models | 249 |
| 7.1 Dynamic models: a classification | 218 |
| 7.2 Dynamic models: specification, estimation, inference and diagnostic control | 254 |
| | 234 |

| 7.3 An empirical analysis with stationary simulated data | 257 |
|--|-----|
| 7.4 An empirical analysis of the determinants of the FED decisions | 262 |
| 7.5 Unit roots and stochastic trends | 269 |
| 7.6 Implications for estimation and inference | 272 |
| 7.7 Cointegration: basics | 277 |
| 7.8 An empirical analysis with integrated simulated data | 283 |
| 7.9 An empirical analysis of the determinants of aggregate | |
| consumption | 293 |
| 7.10 An empirical analysis of short-term interest rates | 299 |
| The main concepts of this chapter | 302 |
| Exercises | 307 |
| | |
| 8. Models for Panel Data | 309 |

| 8.1 The Seemingly Unrelated Regression (SUR) model | 309 |
|---|-----|
| 8.2 The Fixed Effects model | 314 |
| 8.3 The Random Effects (RE) model | 317 |
| 8.4 Some additional considerations on fixed and random effects | 322 |
| 8.5 An empirical analysis with simulated data | 324 |
| 8.6 An empirical analysis with simulated data on the use of fixed | |
| and random effects methods | 333 |
| 8.7 An empirical analysis with simulated data when N>T. | 338 |
| 8.8 An empirical analysis of the effects of public capital in the Italian | |
| regions | 345 |
| The main concepts of this chapter | 356 |
| Exercises | 359 |

9. Models for Qualitative Data

361

| 9.1 The linear regression model with a binary dependent variable | 361 |
|--|-----|
| 9.2 The LOGIT and PROBIT models: specification | 363 |
| 9.3 The LOGIT and PROBIT models: estimation and interpretation | |
| of estimated coefficients | 365 |
| 9.4 Model evaluation | 368 |
| 9.5 An empirical analysis with simulated data | 369 |
| 9.6 Leading indicators for GDP growth | 373 |
| 9.7 An empirical analysis of the sign of stock returns | 378 |
| The main concepts of this chapter | 383 |
| Exercises | 386 |
| | |
