Table of Contents

Introduction 1
Acknowledgments 5

1 Making Decisions in Infrastructure Investment 7
1.1 Introduction 7
1.2 Fiscal Constraints and Infrastructure Investment 10
1.2.1 An Illustrative Model 10
1.3 Some Evidence from the Introduction of the EMU 13
1.4 Counterfactual Evaluation and Project Appraisal 21
References 23

2 Assessing Financial Profitability of Infrastructure Investment 27
2.1 Introduction 27
2.2 Basics of Financial Analysis 28
2.3 Private Participation in Infrastructure Investment 31
2.4 The Case of Milan's M4 Metro Line 35
References 38

3 Introduction to Cost–Benefit Analysis 41
3.1 Basic Structure of Cost–Benefit Analysis 41
3.2 A Discussion of the Theoretical Framework of CBA 42
3.3 The Calculation of the Variation in Social Welfare 50
3.4 Wider Economic Effects and Impact Analysis 55
3.4.1 Quantifying Wider Economic Benefits 55
3.4.2 A Case Study: The Evaluation of Wider Economic Benefits of the HSR 57
References 61

4 From Market Prices to Shadow Prices 65
4.1 Shadow Prices and the Social Planner 65
4.2 Empirical Approaches for Estimating Accounting Prices 67
4.3 The Social Cost of Labor 70
References 72

5 The Evaluation of External Costs and Benefits 75
5.1 Introduction 75
5.2 Revealed Preference Methods 76
5.2.1 Market Analogy Method 77
5.2.2 Intermediate Good Method 79
5.2.3 Defensive Expenditure Models and Averting Behavior 79
5.2.4 Hedonic Price Method 80
5.2.5 The Value of Time 87
5.2.6 Travel Cost Method 88
5.3 Stated Preferences Methods: Contingent Valuation 90
5.4 Measuring External Costs from Transportation 98
5.4.1 Accidents: Valuing Risks Borne by Others 98
5.4.2 Air Pollution: Health, Crops, Materials, and Biodiversity 98
5.4.3 Climate Change: Valuing Carbon Consistently 99
5.4.4 Noise: Exposure and the Valuation of Decibels 99
5.4.5 Congestion: Time Lost and Deadweight Costs 99
5.4.6 Well-to-Tank Emissions: Counting Upstream Externalities 99
5.4.7 Habitat Damage: Land Take, Fragmentation, and Sensitive Areas 100
References 100

6 Discounting Costs and Benefits 103
6.1 Introduction 103
6.2 The Baseline Approach 104
6.3 Anomalies in Individual Time Preference 106
6.4 Social Discounting 111
6.5 Relevance of Social Discounting for Resource and Environmental Policy 115
6.6 Concluding Remarks 117
References 117

7 Accounting for Risk and Uncertainty in Infrastructure Investment 123
7.1 Introduction 123
7.2 The Evaluation of Risk and Uncertainty 125
7.3 The Global Sensitivity Analysis 130
7.4 Local Sensitivity Analysis 130
7.5 Concluding Remarks 135
References 136

8 Conclusion 139
8.1 Summary of the Book 139
8.2 The Political Economy of Project Appraisal 140
8.3 Infrastructure, Climate Change, and Sustainable Appraisal 142
8.4 Bringing the Threads Together: Toward an Integrated Framework 143
