

# Table of contents

Preface by Gianmario Verona	IX
Introduction	1

PART I  
DEFINITIONS AND APPLICATIONS  
OF ARTIFICIAL INTELLIGENCE IN HEALTHCARE

1	Artificial Intelligence in Healthcare	7
1.1	Introduction	7
1.2	Defining the perimeter of the analysis: artificial intelligence	7
1.3	Defining the perimeter of the analysis: other relevant terminology	17
1.4	Concrete applications of AI in healthcare	22
1.5	Conclusions	38

PART II  
KEY ETHICAL, LEGAL, AND POLICY CHALLENGES  
IN REGULATING ARTIFICIAL INTELLIGENCE IN  
HEALTHCARE

2	Legal Theory Part. Addressing the Ethical and Legal Challenges of the Design, Development, and Deployment of AI in Healthcare	43
2.1	Introduction	43
2.2	Ethical challenges	45
2.3	Issues related to AI ethics	47
2.4	Six relevant ethical issues	52
2.5	Legal issues	64
2.6	Conclusions	71
3	Policy Challenges in Regulating AI in Healthcare	73
3.1	A global race to better regulate (or not regulate) artificial intelligence in healthcare	73

3.2	The need for global harmonization in terms of definitions and approaches	75
3.3	Balancing limitations to ensure responsible use of AI with the need to avoid the inhibition of innovation. California as a case study and European Union's strategy to enhance competitiveness	79
3.4	Considering healthcare sector-specific needs when developing AI regulations	85
3.5	The risk-based approach applied to the healthcare sector: cases of use	86
3.6	Regulating dynamic AI models and black boxes	88
3.7	Ensure accountability and liability even where there may be a significant loss of human control	91
3.8	Ensure transparency and explainability from AI systems providers and in the relationships between healthcare professionals and patients	96
3.9	Can artificial intelligence be an inventor?	98
3.10	Promoting AI literacy and education between healthcare professionals, patients, and institutions	99
3.11	Measuring the real environmental impact of artificial intelligence	100

### PART III

## REGULATING ARTIFICIAL INTELLIGENCE WORLDWIDE: DIFFERENT APPROACHES FOR ADDRESSING DIFFERENT NEEDS AND PRIORITIES

<b>4</b>	<b>Safeguarding Individuals and Society as the Main Priority: The European Right-based Approach</b>	<b>105</b>
4.1	Introduction to the European regulatory approach to AI	105
4.2	The risk-based approach of the AI Act	109
4.3	The room for <i>maneuver</i> in the classification established by the AI Act	119
4.4	How the AI Act regulates high-risk AI systems	121
4.5	How the AI Act regulates any type of AI systems	131
4.6	AI Act and the interplay with the legislative framework for data processing	132
4.7	Liability in the context of AI	143
4.8	AI Act and the Brussels effect?	147

<b>5</b>	<b>Maintaining a Global Leadership: Regulation of Artificial Intelligence in the United States</b>	<b>151</b>
5.1	Betting on artificial intelligence to develop cutting edge innovation in healthcare and maintain US leadership in the global economy	151
5.2	Key differences between the European Union and the United States AI regulatory frameworks	152
5.3	The long process to build a federal regulatory framework	153
5.4	The crucial role of federal agencies in AI regulation	167
5.5	In the wait for federal regulation, States started legislating specific AI uses	174
5.6	Ensuring privacy protection in the US; concerns about an outdated regulatory framework	176
<b>6</b>	<b>Local Regulations for Local Needs: A Global Perspective on AI Regulation</b>	<b>185</b>
6.1	The adoption of the risk-based approach worldwide: current practices in the G7 countries beyond EU and US	185
6.2	Other pioneer countries leading in AI regulation and international policy shaping	195
6.3	Unleashing the potential of AI in African countries	208
<b>7</b>	<b>Conclusions</b>	<b>213</b>
7.1	Final thoughts and recommendations	213
