

Table of Contents

Foreword	1
Contributors	3
1 Marketing Research within the Marketing Intelligence System	5
by <i>Gabriele Troilo</i>	
1.1 Marketing knowledge and competitive advantage	5
1.2 Marketing knowledge and the firm's market orientation	7
1.3 The marketing intelligence system: an introduction	10
1.4 The marketing intelligence system: types of data and the data collection process	14
1.5 The use of the intelligence system and marketing research	17
1.6 Conclusions	18
2 Marketing Research: See, Hear, Measure	19
by <i>Alberto Mattiacci</i>	
2.1 Preliminary reflections	20
2.1.1 Market research and management	22
2.1.2 The cultural references of the researcher	25
2.1.3 The epistemological foundations	27
2.2 The research process	32
2.2.1 From market problem to research topic	32
2.2.2 From the research formula to the presentation of results	49
2.3 The different research taxonomies	59
2.4 The nature of marketing information	65
2.4.1 Qualitative information	65
2.4.2 Quantitative information	66
2.4.3 From comparison to integration	67
2.5 The trade-offs of marketing research	68
2.6 Conclusions	71

3	Qualitative Research	75
	by <i>Gabriele Troilo</i>	
3.1	The distinguishing characteristics of qualitative research and its major limitations	75
3.2	The data collection techniques	83
3.2.1	Individual interview	84
3.2.2	Focus group	99
3.2.3	Observation	108
3.2.4	Marketing research online communities	114
3.3	The analysis of qualitative data	116
3.3.1	Data reduction	116
3.3.2	The organization of data	119
3.4	Conclusions	127
4	Quantitative Research	129
	by <i>Luca Molteni</i>	
4.1	Introductory considerations	129
4.2	The data collection techniques	131
4.2.1	Observation	131
4.2.2	Experiment	133
4.2.3	Survey	135
4.3	Processing the information collected: statistical analysis of the data	148
4.3.1	Descriptive statistics and inferential statistics	148
4.3.2	Discontinuous and discrete qualitative and quantitative data	149
4.3.3	Univariate descriptive statistics	152
4.3.4	Bivariate descriptive statistics	172
4.3.5	Hints in inferential statistics: tests for studying the association between variables	186
4.3.6	Hints of multivariate statistical analysis	193
5	Sampling	
	by <i>Renata Trinca Colonel</i>	
5.1	Introduction to statistical sampling	195
5.1.1	The sample surveys	196
5.1.2	The tools for evaluating sample estimates	197
5.2	The sampling methods	202
5.2.1	Probabilistic sampling	202
5.2.2	Non-probabilistic sampling	208
5.2.3	Repeat sampling (panel)	209
5.3	The sample size in quantitative research marketing	211
5.3.1	The case of the average	211
5.3.2	The case of proportion	213
5.4	The design of experiments	214

5.4.1	The concept of “causality”	214
5.4.2	The main types of experimental design	215
5.5	Sampling in qualitative research	217
5.5.1	Sampling in focus group research	219
6	Marketing Research on the Evolution and Potential of Markets	223
	by <i>Luca Molteni</i> and <i>Gabriele Troilo</i>	
6.1	Introduction	223
6.2	The concepts of market potential, market demand, and potential gap	225
6.3	The estimation of market potential and actual demand	229
6.4	Marketing research for estimating market potential and actual demand	234
6.5	Qualitative marketing research for estimating the potential and actual market	234
6.5.1	The Delphi method	234
6.5.2	The construction of market scenarios	236
6.6	Quantitative marketing research for estimating potential and actual demand	240
6.6.1	The survey	240
6.6.2	The quantitative methods of forecasting evolution in markets	244
7	Research for Market Segmentation	
	by <i>Luca Molteni</i>	
7.1	The segmentation process: the basic steps	271
7.2	Segmentation by homogeneity	276
7.2.1	The classical approach: factor analysis and cluster analysis	276
7.2.2	The flexible approach: conjoint analysis and cluster analysis	293
7.3	Alternative methods to full profile conjoint for value measurement	302
7.4	Segmentation by objectives	305
7.4.1	Linear discriminant analysis and LOGIT analysis (logistic regression)	305
7.4.2	Automatic interaction analysis techniques	306
7.4.3	Hints to neural networks	311
8	Research for Product Positioning	313
	by <i>Luca Molteni</i>	
8.1	Product positioning as a strategic marketing decision	313
8.2	The statistical techniques for perceptual mapping	315
8.2.1	Linear discriminant analysis	316
8.2.2	Correspondence analysis	328
8.2.3	Multidimensional scaling (MDS)	336
